Dear Sir / Madam,

### Highway Maintenance Scheme – Osbaldwick Drainage

City of York Council will be carrying out maintenance works on Osbaldwick Village commencing on 2<sup>nd</sup> August 2021 for a period of 9 weeks (weather permitting). The site extents are as shown on the plan on reverse. The works will be carried out between 9.15am till 5.00pm working Monday to Friday only.

In order to carry out the work safely, the first 3 weeks of the works (2<sup>nd</sup> August – 20<sup>th</sup> August) are going to be carried out under a full road closure, the following 5 weeks (23<sup>rd</sup> August – 24<sup>th</sup> September) are going to be carried out under local traffic management with the use of 'stop and go' traffic control boards which will be necessary whilst works are taking place to manage lane closures, and the final week (27<sup>th</sup> September – 1<sup>st</sup> October) will be carried out under a full road closure for resurfacing.

The closures will be carried out in two phases to minimise disruption, phase 1 will be from the junction with Derwent Way up to the junction with Galligap Lane and phase 2 will be from the junction with Osbaldwick Lane up to the junction with Derwent Way.

Site staff will be on hand to advise and assist all road users (including cyclists and pedestrians) about any access restrictions once the works are ongoing.

**NB: The contractor will be operating under social distancing guidance wherever possible due to the current Covid-19 restrictions, and has permission from the local authority to undertake this essential work at this time.** Your co-operation throughout the duration of the works will be much appreciated.

All on-street parking will be suspended for the duration of the works, but specific access requirements can be arranged by speaking to the site Traffic Management Operatives, who will coordinate with residents (and business requirements) around the ongoing work operations.

Household waste and recycling collections will take place as normal.

Emergency services will be permitted through the works in any situation.

As with any construction work, there is likely to be a certain amount of disruption and inconvenience to the public. However, the contractor will at all times try to keep any disruption to a minimum.

I will be monitoring the works on site, but should you wish to discuss this work in further detail, please do not hesitate to contact me at the email address or telephone number provided above.

Yours faithfully,

Abbey Walker  
Undergraduate Engineer – Highways Maintenance
